

## Assignment -5 Requirements

### **Main Requirements:**

**1. Follow the Figma design:** Your website design should be similar to Figma. You can change the color but choose a color palette that will be pleasing to the eye. You can change images but use relevant images which you can collect from Google and other resources.

**2. Create a JSON File .Each data will contain.**

- Title
- Price
- Description
- Size
- Color
- Serial No
- Category
- Tags
- Share
- Review (✗don't use lorem ipsum text, use meaningful content)
- Additional information

**3.** Clicking on a product's card will redirect to the Product Details page where you can see the details of the Product.

.

**4.Products Details Page:** This will be a dynamic route. The Product details page will have the following Figama.

**5. Responsiveness:** The website must be fully responsive and optimized for **mobile** and **tablet** devices.

**Challenges Requirements:**

- **404 Page:** Make a 404 route/not found page.
- **Contact Page:** Include an embedded Google Map on this page.

**You need to Submit:**

- Your Github repository link
- Live site link

**Deadline:**

 **21 November 2024, 11:59 PM**

Happy coding! 😊
